LARGE FORMAT SLAB

ARTSUM

Large Format Slab

With the continuous development and advancement of architectural ceramic manufacturing equipment and processes, porcelain slabs have

broken through the limitations of traditional tiles in terms of product specifications and size.

Porcelain slabs can create a continuous, complete surface texture with very fewjoints, enabling interior design and architectural design to be well integrated and coordinated across spaces (floors and walls, and different rooms), thus providing more appealing appearance. Ideal for large spaces or large-scale buildings, porcelain slabs enhance the linear design of the interior and visually magnify the space of rooms and buildings.

Simultaneously, the use of large-size porcelain slabswith small joints makes them super easy to clean and maintain, and they are moreflexible and faster to install in terms of construction.

Artsum Porcelain Slabs Series is available in seven different finishes (Marble, Stone, Wood, Concrete, Terrazzo, Fabric, Metallic) to satisfy the diverse design needs in avariety of scenarios.

Whether it is commercial or residential properties, be it indoor or outdoor, the wide range of looks, surfaces and colors of the slabs can cater to the needs of every application. In addition, the thinnest Artsum Porcelain Slabs can be manufactured in 3.5 mm. Being ultralight weighted, they demonstrate exceptional durability and weather resistance, making them ideal for building facade finishes in combination with ventilated walls.

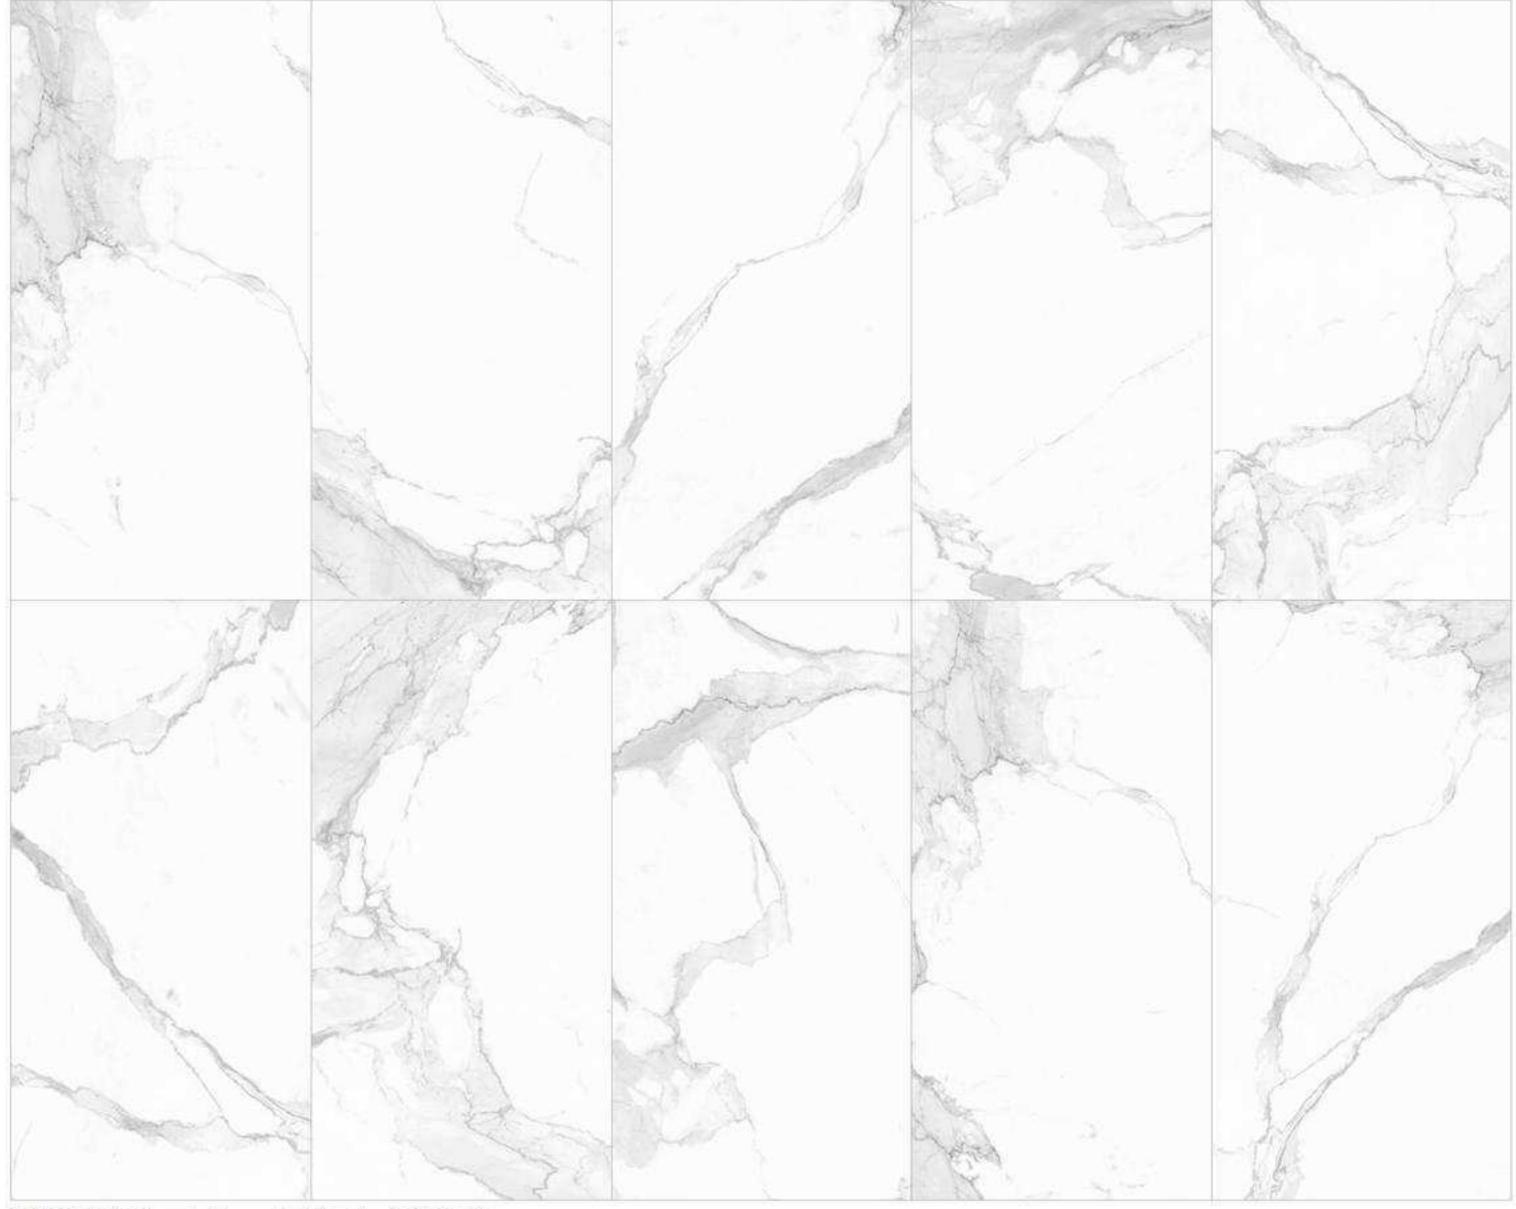

Popular Size:

750x1500x9.5mm, 900x1800x5.8mm, 800x2000x3.5mm, 800x2000x5.5mm, 900x2000x3.5mm, 900x2000x5.5mm
